MOUNT FARM SURGERY
CARING FOR YOU AND YOUR HEALTH

Infection Prevention & Control

At MOUNT FARM SURGERY, we are committed to providing a safe, clean environment for our patients, visitors and staff.

Our Infection Prevention & Control (IPC) procedures include:

- Regular cleaning and disinfection of clinical and non-clinical areas.
- Hand hygiene facilities for staff, patients and visitors.
- Use of appropriate personal protective equipment (PPE) where required.
- Safe management and disposal of clinical waste.
- Effective decontamination of medical equipment.
- Staff training in Infection Prevention & Control.
- Regular IPC audits and environmental monitoring.
- Management of outbreaks and communicable diseases in line with national guidance.

How Patients Can Help

Patients can help reduce the spread of infection by:

- Cleaning their hands on arrival and leaving the practice.
- Using tissues when coughing or sneezing and disposing of them appropriately.
- Not attending the surgery if advised to self-isolate due to an infectious illness.
- Informing reception staff if they have symptoms of an infectious disease on arrival.

IPC Lead

Our Infection Prevention & Control Lead is:

Paula Clark, Nurse Manager

If you have any questions or concerns regarding infection prevention and control, please contact the practice.
